PROFESSIONAL SUMMARY

With a strong sense of empathy and a passion for designing emotionally connected environments, I believe design goes beyond aesthetics. It should promote connection and well-being. As a peacekeeper, I excel at facilitating cooperation and creating connections between stakeholders and clients to achieve mutually beneficial solutions. Maintaining a positive attitude, I focus on the potential of every area and individual involved, fostering innovation and creating an environment where ideas thrive. My self-belief supports my independence and confidence, enabling me to lead purposefully and value teamwork. Taking a strategic approach to design, I consider the bigger picture and combine various components to create cohesive ideas. Seeing projects through to completion and maximizing their potential brings me great satisfaction.
